

WIDE BAND MULTIPLE OUTPUT OUTDOOR BLOCK DOWN CONVERTERS WITH HIGH PERFORMANCE OPTIONS

This series of Outdoor Block Downconverters accept one RF composite input covering either 2 or 3 satellite transponder frequencies and provides either 2 or 3 separate & independent L-band IF outputs in an integral, self-contained weather resistant package designed for antenna mounting.

Ka-band and Ku-band models are available covering the entire SatCom bands. A companion series of Upconverters are also available, as are reverse band models.

A strong set of monitor and control functions support powerful remote control. A contact closure summary alarm is provided for fault monitoring.

The standard phase noise is superior to IESS-308/309 and options are available for lower phase noise surpassing the requirements of MIL-STD-188-164B.
